

# Orandus Narnaul Expansion Plan & Startup Feasibility Report

A Zero-CapEx Blueprint for Digitizing Food Commerce & WhatsApp Fleet Logistics in Tier-3/4 Haryana

|                                                  |                                                             |
|--------------------------------------------------|-------------------------------------------------------------|
| <b>Target Market:</b> Narnaul, Mahendragarh (HR) | <b>Founder:</b> Manish Chauhan                              |
| <b>Platform:</b> Orandus Campus & Food Network   | <b>Status:</b> Confidential Startup Document                |
| <b>Initial CapEx:</b> ~₹8,600 (Under ₹10k)       | <b>Month 3 Net Profit (Est):</b> ₹33,491 / mo (~88% Margin) |

## 1. Executive Summary & The "Why Narnaul" Thesis

While Tier-1 metros are saturated with hyper-competitive aggregators (Swiggy, Zomato) burning millions on rider incentives and customer discounts, **Tier-3 and Tier-4 district headquarters in Haryana present an underserved and highly profitable growth frontier**. Narnaul is the administrative headquarters of Mahendragarh district with an urban population of ~85,000+ and an influx of over 25,000+ young students and competitive exam coaching aspirants concentrated along Rewari Road and Mahavir Chowk.

### Why National Aggregators (Swiggy / Zomato) Fail in Narnaul:

- 1. Aggressive Commissions (25–30%):** Local restaurant margins in Narnaul are 20–25%. Surrendering 28% forces restaurants to either inflate prices or refuse to list.
- 2. Hardware & Tablet Barrier:** Traditional dhabas and halwais on Rewari Road or Pul Bazar do not operate POS tablets or complex merchant dashboards.
- 3. Exorbitant Delivery Fees (₹50–₹80):** Unviable for student budgets seeking a ₹60 burger or ₹80 roll.
- 4. The Informal 'Delivery Dude' Void:** Local two-wheeler delivery fleets (such as *Delivery Dudes* and *Delivery Duck*) already operate informally via WhatsApp, but suffer from chaotic back-and-forth chat threads, blurry photos of paper menus, and frequent billing mistakes.

**The Orandus Strategic Wedge:** Orandus enters Narnaul not as a capital-intensive logistics company buying motorbikes and hiring delivery boys, but as the **lightweight digital operating system**. We provide a lightning-fast photo menu catalog and a 1-tap WhatsApp order ticket. The partner fleet receives structured, mathematically accurate orders; rider delivery capacity triples from 30 to 100+ orders/day; and Orandus earns high-margin recurring software revenue with zero balance-sheet risk.

## 2. Existing Orandus Platform Capabilities & Technical Leverage

The expansion to Narnaul requires zero greenfield development. Orandus already possesses a battle-tested, enterprise-grade codebase operating in NIT Kurukshetra:

| Platform Component        | Core Technical Asset                                    | Strategic Value for Narnaul                                                                  |
|---------------------------|---------------------------------------------------------|----------------------------------------------------------------------------------------------|
| Serverless Edge Stack     | Astro SSR + Cloudflare Workers + D1 SQLite              | ■0 fixed hosting overhead up to 100k daily requests. Instant scalability.                    |
| Client-Side Search Engine | Phonetic token index (<3ms keystroke latency)           | Fast mobile search across 1,000+ dishes even on congested 3G/4G market networks.             |
| Operations Pro Terminal   | Bloomberg keyboard controls, batch availability toggles | Real-time telemetry, live operational tracking, and one-click emergency kitchen closures.    |
| QR Marketing Studio       | SVG/PNG dynamic QR generator with attribution           | Instant printable templates for coaching libraries, table standees, and fleet bike stickers. |
| Data Health Diagnostics   | Automated scanner for invalid phones, zero prices       | Prevents broken links or incorrect contact details from reaching customer eyes.              |

### 3. Product Roadmap: What Next Needs to Be Added

To preserve NIT Kurukshetra's pure direct-call discovery mode while enabling full delivery automation in Narnaul, we introduce a modular multi-city engine:

| Feature Module               | Implementation Specification                                                                                                                                                                                                                                               | Effort  |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1. Multi-City Switcher       | Header location dropdown:  Kurukshetra (NIT KKR)  Narnaul (City). Persisted in cookies and localStorage. | 1 Day   |
| 2. Narnaul Landmark Clusters | Delivery zones: Mahavir Chowk, Rewari Road, Pul Bazar, Court Road, Nizampur Road, Housing Board Colony.                                                                                                                                                                    | 1 Day   |
| 3. WhatsApp Ticket Formatter | Lightweight Alpine.js cart dock that encodes order into itemized WhatsApp message with digital bill link.                                                                                                                                                                  | 2 Days  |
| 4. Single-Kitchen Cart Lock  | Enforces one restaurant per order to prevent multi-kitchen courier confusion.                                                                                                                                                                                              | 0.5 Day |
| 5. Top 25 Vendor Seeding     | Digitizing menus and photos for popular spots: Dosti Pizza, Dev Residency, New Sardar Ji Chicken, Sheetal Dhaba, etc.                                                                                                                                                      | 2 Days  |

### Standardized 1-Tap WhatsApp Ticket Dispatch Format:

[illegible]

#### 4. Financial Model: Startup Capital & Unit Economics

Because Orandus functions as software infrastructure rather than an asset-heavy courier service, **capital expenditure (CapEx) and operational expenditure (OpEx) remain exceptionally low:**

Initial One-Time Setup Costs (CapEx):

| Expenditure Category   | Item Description                                             | Cost (INR) |
|------------------------|--------------------------------------------------------------|------------|
| Cloud & Database       | Cloudflare Workers, D1 SQLite, KV, Pages (Free Tier)         | ₹0         |
| Domain & SSL           | Existing orandus.in multi-city routing infrastructure        | ₹0         |
| Acrylic Table Standees | 40 laser-cut acrylic A6 stands for top 5 cafes (@ ₹80/stand) | ₹3,200     |
| Vinyl QR Posters       | 300 waterproof stickers for libraries & coaching centers     | ₹2,400     |
| Fleet Bike Stickers    | 20 reflective branded stickers for delivery bags/bikes       | ₹1,000     |
| Field Setup Expenses   | Local menu digitizing travel and onboarding sample kits      | ₹2,000     |
| TOTAL INITIAL CAPEX    | Full Turnkey Launch Budget                                   | ₹8,600     |

### Monthly Operating Expenditure (OpEx):

| Operating Cost            | Operational Mechanism                                           | Monthly Cost             |
|---------------------------|-----------------------------------------------------------------|--------------------------|
| Server / Database         | Cloudflare Edge Network (Free Tier handles 100k requests/day)   | ₹0 – ₹400                |
| WhatsApp API              | Client-side deep links (wa.me/), zero Meta Business API charges | ₹0                       |
| Rider Payroll / Fuel      | 100% outsourced to partner fleet (Delivery Dudes / Duck)        | ₹0                       |
| Campus / Youth Scout      | Part-time local representative managing menus and stickers      | ₹3,500                   |
| Monthly Replenishments    | Sticker replacements in coaching centers and libraries          | ₹1,000                   |
| <b>TOTAL MONTHLY OPEX</b> | <b>Ongoing Monthly Operating Overhead</b>                       | <b>~ ₹4,500 – ₹4,900</b> |

### 6-Month Profit & Loss (P&L) Projections:

| Metric / Revenue Stream               | Month 1 (Launch)  | Month 3 (Growth)   | Month 6 (Scale)     |
|---------------------------------------|-------------------|--------------------|---------------------|
| Daily Orders                          | 25 orders / day   | 75 orders / day    | 150 orders / day    |
| Monthly Order Volume                  | 750 orders        | 2,250 orders       | 4,500 orders        |
| Platform Order Fees (₹10/order)       | ₹7,500            | ₹22,500            | ₹45,000             |
| Featured Vendor Subscriptions         | ₹2,997 (3 spots)  | ₹5,994 (6 spots)   | ₹9,990 (10 spots)   |
| Local Sponsor Ad Banner               | ₹0                | ₹3,500 (1 sponsor) | ₹6,000 (2 sponsors) |
| Table QR Digitization Kits (One-Time) | ₹11,994 (6 spots) | ₹5,997 (3 spots)   | ₹3,998 (2 spots)    |
| <b>GROSS REVENUE</b>                  | <b>₹22,491</b>    | <b>₹37,991</b>     | <b>₹64,988</b>      |
| Operating Expenses (OpEx)             | ₹4,500            | ₹4,500             | ₹5,500              |
| <b>NET MONTHLY PROFIT (EBITDA)</b>    | <b>₹17,991</b>    | <b>₹33,491</b>     | <b>₹59,488</b>      |
| <b>Net Profit Margin</b>              | <b>80.0%</b>      | <b>88.2%</b>       | <b>91.5%</b>        |

## 5. 30-Day Go-To-Market (GTM) Execution Plan

| Timeframe                           | Core Execution Milestones & Deliverables                                                                                                                                                                                                                                                                                           |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Days 1–5</b><br>Tech Setup       | <ul style="list-style-type: none"> <li>Add multi-city toggle in header &amp; D1 schema.</li> <li>Digitize and seed menus for top 15 Narnaul spots (Dosti Pizza, Dev Residency, New Sardar Ji Chicken, Sheetal Dhaba, Bikaner Sweets).</li> <li>Configure WhatsApp 1-tap dispatch engine.</li> </ul>                                |
| <b>Days 6–10</b><br>Fleet Handshake | <ul style="list-style-type: none"> <li>Meet the operational head of <b>Delivery Dudes</b> (9485-613-613) or <b>Delivery Duck</b> (98179-00121).</li> <li>Demonstrate live ordering on mobile phone.</li> <li>Finalize flat ₹40 delivery fee and ₹10 platform revenue split.</li> </ul>                                             |
| <b>Days 11–18</b><br>Field Blitz    | <ul style="list-style-type: none"> <li>Install 40 acrylic QR standees on dining tables of cooperative cafes.</li> <li>Deploy 300 vinyl QR posters across 10 study libraries, coaching centers, and student PG rooms around Rewari Road and Mahavir Chowk.</li> </ul>                                                               |
| <b>Days 19–30</b><br>Launch & Ads   | <ul style="list-style-type: none"> <li>Public launch campaign: 'Narnaul ke sabhi favourite restaurants ka menu ab ek jagah — bina Swiggy commission ke WhatsApp pe order mangwao.'</li> <li>Process first 500 orders through fleet.</li> <li>Sell 1st local sponsor banner slot to a coaching center/gym for ₹3,500/mo.</li> </ul> |

**Risk Analysis & Operational Guardrails:**

| Risk Factor             | Severity | Mitigation Strategy                                                                             |
|-------------------------|----------|-------------------------------------------------------------------------------------------------|
| Fake / Troll Orders     | Medium   | Mandatory 20-second rider confirmation phone call before food is ordered at restaurant counter. |
| Fleet Rider Shortage    | Medium   | Dual fleet integration (Delivery Dudes + Delivery Duck) with round-robin dispatch routing.      |
| Restaurant Menu Changes | Low      | Orandus Operations Hub allows instant price and availability updates in under 10 seconds.       |

**Conclusion:** Narnaul proves the repeatable playbook for Orandus: transforming from a single-campus student utility into a profitable multi-city regional commerce network. With a total launch capital under ₹10,000 and net monthly earnings exceeding ₹35,000 – ₹60,000 within 90 days, Narnaul establishes the foundation for rapid expansion across Haryana district headquarters.
